

## CSCS Logoed Cards

## EHS Alert No. 30

To ensure workers on Chalcroft managed sites have proof of at least a basic understanding of health, safety and environmental awareness or training as from the 1<sup>st</sup> April 2015 it will be a requirement that valid CSCS logoed cards are held by all site workers.

To allow for this to be communicated and adopted a six month grace period will be given to the **1<sup>st</sup> October 2015** before this becomes a mandatory requirement.

All subcontractors on the Approved Database will be written to and advised of the requirement over the next few weeks and posters will be issued for display on sites and company offices.

**If you are responsible for placing enquires or orders with subcontractors or undertake pre-start meetings please include this requirement in any formal communications.**

Site visitors, delivery drivers and site personnel that are not undertaking physical construction activities on site will be excluded from the requirement.

The following CSCS logoed cards and equivalent schemes are deemed acceptable:

- Plant Operators CPCS
- Plant Operators NPORS
- Scaffolders CISRS
- Electricians ECS
- Energy and Utility EUSR
- HVCA SkillCard
- Demolition Workers CCDO
- Engineering ACE
- Safety Passport CCNSG
- Northern Ireland CSCS CSR
- Plumbing, M&E JIBPMES

There are currently 1.9 million CSCS card holders in the UK and there are steps being taken by Government to make this a compulsory requirement within the construction industry as already exists with members of the UKCG and their supply chain.

If you have any queries or require any further information please don't hesitate to contact me or a member of the EHS Department.
